SOLUTION FACTSHEET
EDI for SYSPRO Powered by TIE Kinetix

Outsourcing EDI operations to Automate Business Processes

For most organizations, outsourcing EDI operations is a smart move—it's practical, economical, and fundamentally scalable. SYSPRO and TIE Kinetix have partnered to provide a fully managed and integrated end-to-end EDI solution that will help you to streamline your order to invoice process, all while minimizing data entry and costly errors.

Easily Automate Your Procure-to-Pay and Order-to-Cash Processes Critical business documents flow in and out of your organization daily—orders, invoices, advanced ship notices, order acknowledgements, and more. Paper purchase orders can take up to 10 days from the time the order is prepared to the time it is shipped. Payments can take upwards of 50 days.

By automating data capturing, validation, translation, and distribution of business documents in real time, companies are able to streamline end-to-end business processes with trading partners at lower costs, with no errors, and with maximum flexibility.

EDI for SYSPRO at a Glance EDI for SYSPRO provides you with one-stop shop for all your EDI needs, making electronic document exchange between SYSPRO and your trading partners easy and hassle-free. You'll no longer need to navigate between multiple systems to accomplish day-to-day tasks.

You can also stop worrying about new requirements and unique maps. With TIE Kinetix's extensive partner network, you can leverage more than 300,000 pre-configured trading partner connections. You'll also have access to a rich library of trading partner maps and application connectors.

Easily connect with Amazon, Walmart, Target, Home Depot, Lowe's, and more. We guarantee full compliance for you and your partners, so let us take care of your entire integration service environment so you can focus on your core business.

Based on 34+ years of experience and continuous development in B2B integration and SaaS solutions, EDI for SYSPRO is easy to use. It requires zero development and minimal set up, providing huge savings for implementation and maintenance.
